

WE'D LIKE TO SEE HS2 OUT OF THE WOODS TOO.

ALL 108 OF THEM.

108 ancient woodlands are set to be damaged or destroyed by HS2. Along with hundreds of other precious wildlife sites. It's time to stop and think. No one, least of all us, wants this project to cost the earth. If the Government is serious about the climate and ecological emergency we face it needs to act quickly and get on a different track.

Time to ReThink HS2

GREENPEACE
